

# Social.amp

Social.amp amplifies your highly relevant, timely social content to premium travel and meeting planner audiences. With this new ad format, you can feature popular/recent social posts from Facebook, Instagram, or Twitter as display ads on Northstar's brand safe editorial sites, extending the impact of your social messaging.

## HIGHLIGHTS

- In-line placement and social media formatting help avoid banner blindness, resulting in higher CTRs than standard display units
- Content sites naturally promote focused reading, so your Social.amp ads will have higher attention time than the rapid scrolling behavior on social media networks
- Campaigns utilize already using existing social posts, so no additional creative approvals are needed and time to market is fast

## HOW IT WORKS

- Client supplies 1-3 social video or image/text posts to be used over the course of the program
- Northstar generates creative tags and flights campaign through our ad servers
- Social posts run 1-2 weeks, with campaign optimized to focus on best performing posts
- Reporting will be delivered on a monthly basis - 1 month minimum (2-3 months suggested)
